**PARTNERSHIP
OFFER**

OUR SERVICES

Personal Manager

You'll get any help and consulting regarding partnership and products questions from your personal manager.

Common Work on Product Development

Your sales practice and our manufacturing experience will help us to create a unique product successful on your market.

Staff Product Training

Your managers will receive full training about specifications of our products and sales tips. You are also invited to visit our factory to get to know the production process.

Flexible Shipment Terms

We will offer you the most suitable and profitable shipment terms taking into account your requests.

Marketing Support

We appreciate our partnership and provide various marketing support in order to help you in your business development.

Special Discounts System

Mutually beneficial partnership can be established thanks to the flexible discounts we provide depending on your sales volumes.

EVOLUTION OF MARIO

1998

The history of Mario started as a small family business, producing first towel rails using home facilities, and growing to 12 workers in 2002, when the manufacture moved to the 200 m² workshop.

2006

Increasing production volumes caused the need in new bigger production areas. Company with 93 workers moves to the renovated plant in Lityn.

2015

Opening the new workshop with flow line manufacturing.

Today the Mario factory covers an area of 10,000 m², with a staff of 210 people, producing 400 items per day

MARIO TODAY

900 Partners
all over Ukraine

17 European
Certificates

40 Clients
abroad

19 Countries
we work with, including the UK,
Germany, the Netherlands,
Denmark, Sweden, France.

280 Models and sizes
of towel rails and design radiators

14 Levels
of multistage testing of each item

We use the best European raw materials

AISI 304 stainless steel pipes (18% Cr, 8% Ni) are supplied from Spain and Finland.

Unique environmentally friendly non-toxic paint

is produced in France specially for Mario, it's perfectly adhesive to stainless steel, shockproof and UF resistant, which is proved by various tests.

QUALITY

mario 
stainless steel design radiators

Hidden connection kit

we offer to our clients to make the installation of electric radiators easy and aesthetic and to hide all the cords.

We care about our clients

and made the installation super easy - there is no need for additional materials, as all they need is included in the set.

IP44

Our products are protected against dust and water and are safe for usage in wet environments.

22 bar & 1,500 V

Each product is tested under the pressure of 22 bar, and all the electrical rails pass the 1500 V breakdown test.

RELIABLE

Certificates

Mario products quality and safety are confirmed by 17 European Certificates, including EN 442. Our towel rails are RoHS compliant.

Warranty

Mario is confident in the reliability of its products that's why we give a 50-year warranty for water heated towel rails in closed heating systems and 5 years of warranty for the dry electrical models.

Connector

You no longer need to think about the socket location - with the new connector by Mario the side of the connection doesn't matter. The plug simply connects to the right or left side of the towel rail.

INNOVATIONS

mario 
Mario steel design radiators

Timer-regulator

It helps to adjust the temperature by choosing one of the three modes. Setting up heating time to 3 or 6 h, our clients can control the working time of the towel rail and save up to 60% of energy.
