

We are Ukrainian company "West Berry".

The main activity of our company is provision and realization of wild growth and cultivated berries, mushrooms and horse reddish, its primary processing in particular cleaning, sorting, freezing and afterwards wholesale in Ukraine as well as in the countries of the European Union, for using in the certain branches of food industry.

We started our business in February 2016. Our company is located in the town of Drohobych, Lviv region.

Our production is a unique and invaluable since it is collected in the ecologically clean area of the Carpathian mountains, in particular Western part of Ukraine.

We propose a wide range of berries such as: raspberry, blackberry, cherries, bilberries, sea-buckthorn, elderberries, rowan, thorn, chokeberry, hip-rose, plum. Each of these berries is not only a tasty ingredient to a dish or drink but also is a complete healing remedy since they have a full complex of vitamins.

For saving all the useful qualities of berries and mushrooms we are using the process of freezing. It allows to keep all our products in a good condition during a long time. The berries go through the special tunnel of the deep freezing that gives the possibility to save not only the nice looking view of the products but also the taste, the aroma and of course the useful properties of them.

For the companies which are interested in the forest mushrooms we are proposing fresh as well as frozen girolles, sepe boletus, yellow boletus and others.

Thanks to the process of deep freezing, the mushrooms save all the useful properties and taste qualities.

The collection and sorting of all our products is taken place only on the ecologically clean areas and the cleanest regions of our country namely Ivano-Frankivsk and Lviv regions.

The provision and the processing of berries and mushrooms pass according to the strict taking into account of all European Requirement and Standards, and all our products pass careful laboratory testing control.

Recently our company got the certificate of the International Association Organic Standard. So, we are totally sure in the quality and safety of our production.

For the time of our working, our company recommended itself as a reliable and stable subject of economic activity in Ukraine as well as abroad.

Thanks to the using of the modern technologies, all our production is sorted, sized and packed into different kinds of packages depending on the kinds of the product and the wishes of the customer.

All the production process demands quite a short processing time and strictly followed temperature regimes as regards to storage and transporting, what is very important for perishable products.

The main business partners of our company are the enterprises which are situated in France, Poland, Germany, Switzerland, Lithuania, Spain, Italy, Austria. Nowadays we have exported about 2500 tons of our production into the European countries.

Our experience proves that the foundational principals of our activity is high quality, good price and reliability.

For quite short time enough, thanks to hard and professional work and high quality of our products, we won the trust of our customers and are very proud of it.

Our team is a group of young, perspective and highly professional managers and technologists who are strictly control the production process that allows us to be one of the leaders on the Western Ukrainian food industry market.

So, our main goal is to propose our clients the highly qualitative products for the best prices. And for these reasons we are constantly modernizing of the production process, developing our possibilities and looking forward for trustable and reliable business partners.

We believe in the bright future of our country and want to develop good partnership with foreign companies.
