

YES STRAWS

ECO-FRIENDLY DRINKING STRAWS

Made from cane
and nothing else

We created YesStraws to replace plastic straws which were harming the environment all over the world.

All of our straws are fashioned from all natural products like wheat stems and cane. The result is minimal harm to the environment and a massive improvement over the plastic straws our society has become so dependent upon.

Our straws don't linger in landfills or pollute the ocean. Instead, they slowly decompose, as natural products do. The function is similar to a plastic straw, but the feel is so much better. Having a natural and organic feel rather than the harmful chemicals of plastic is a therapeutic improvement.

100% Biodegradable

Natural

Disposable

Never Soggy

Eco-Friendly

Our straws will make your morning, afternoon, or night more enjoyable, and you'll feel better about yourself knowing you're not hurting the environment. We believe this is the beginning of a big trend as we as a society shift to more eco-friendly products, and the hope is that we can continue to supply our customers with great products as we continue to evolve with this trend.

YES STRAWS

ECO-FRIENDLY DRINKING STRAWS

Cane straws

THE PERFECT COMPLEMENT TO YOUR HEALTHY LIFESTYLE

Whether you're drinking fruit smoothies, fresh juices, or bubble teas, cane straws will add a clean and earthy vibe to your drink that will make your healthy drink more enjoyable.

100% WASTE-FREE AND ECOLOGICALLY FRIENDLY

Our planet is important, which is why our straws are made from cane and nothing else. The cane is harvested and produced in ecologically clean regions and we only use eco-friendly materials to wash, clean, dry and prepare the straws.

APPROPRIATE FOR ANY GATHERING

Family get togethers, cocktail parties, or breakfasts alone... these straws are perfect for every occasion. Cane straws are perfect for cocktails and long drinks, as they come in 2 convenient lengths and 3 sizes (narrow, medium, and wide).

ROBUST AND DEPENDABLE

Our straws are bigger and more firm than most straws, and you will find that they don't break when you bite or put pressure on them. You'll have no trouble drinking thicker liquids like milkshakes with this strong design.

ENABLE COMMUNITIES TO PROSPER

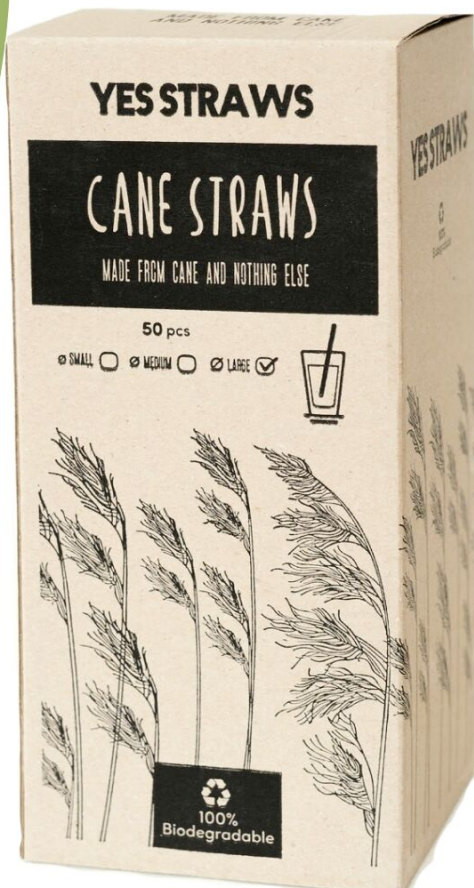

In our motherland, there is tons of poverty. So many farmers have a surplus of cane, but nothing to do with it. By purchasing these straws, you help these farmers feed their families and live a better life.

Being ECO is the main trend in HoReCa for the next 5 years

Nowadays, environmental awareness and eco-consciousness are becoming the most important features of companies' politics. It is extremely important for consumers when they decide whether to purchase goods or use services. Using eco-friendly products will stand your business out from rivals, increase customer loyalty and help to increase the number of mentions on social media.

WOW-EFFECT

Our straws are new and cool. There are not so many venues that use them. You may be among the first to pleasantly surprise your customers by taking care of the environment and the future of our planet. New products are bound to attract the attention of innovators and opinion leaders.

INCREASED REACH ON SOCIAL NETWORKS

Social networks are a major source of new business clients. The use of our environmental-friendly straws will be noticed by an active audience that wants to share something new and hype. Get ready to follow the splash of mentions on social media and having your direct full of new messages!

CUSTOMER LOYALTY

More and more people start thinking about environmental pollution problems. They begin to run eco-lifestyle, giving up plastic bags, toothbrushes, irresponsible consumption of clothing and so on. Show your clients that you care about the world by making their lives much more eco than they used to be. Extremely soon you will feel that special sense of your clients' gratitude and a great reach of new customers. Once you become an eco-responsible business, you become a part of the community.
